

Introduction of free or low-priced medical treatment  
Given by Public Interest  
Incorporated Association Yamanashi Kinrosha Iryo Kyokai

Please consult us if you are in the following case:

- If you don't have a health insurance card or are issued a "short-term insurance card" or a "qualification certificate" of national health insurance
- If you think it is difficult to pay for medical expenses due to your reduced income because of illness, disability, restructuring or unemployment and so on
- If you think it is difficult to pay for medical expenses because they are high

### How to use the free and low-priced medical treatment system

People who cannot visit a medical institution for economic reasons can apply for this medical treatment system. About medical expenses paid at the counter, either full amount (free) or half amount (low) will be subtracted from the total amount depending on the current income situation such as unemployed, homeless, etc.

- 1** Application: Please contact the following hospital or clinic in which this system is used. Regardless of whether or not the system is applied, your necessary treatment is first started. It is important to start your treatment as soon as possible. Please consult us without worry.

- 2** Interview: The person in charge will ask you about your current living situation and also tell you about this system. If it is thought to be necessary for using the system based on the content of your explanation, you can apply for it. Even if it is not thought to be necessary, we will give advice about finding a way to overcome your problems such as paying treatment expenses and immediate life.

- 3** Decision: After your application we will check if it is proper to apply this system and let you know the result.

※ The free or low-priced medical treatment can be used only for the payment at the following medical institution. This system does not cover expenses which are not covered by medical insurance, such as payments at pharmacies, medical examinations and certificates.
